

Package Development and Customization

Please discuss the following customization options with your project manager. We offer à la carte pricing or customization package arrangements which can be tailored according to your budget parameters.

LawSuite Ribbon design work, adding or removing command groups, rearranging commands, incorporating firm's in-house automation, etc.
Template customization for Letter, Fax Cover Sheet, Memo and administrative templates.
Document Assembly template creation and customization for audit or billing letters, fee agreements, engagement letters, agreement forms, etc.
Modifications to Numbering Scheme Style Sets.
Customizations for File Stamp macros.
Custom macro development which will include any non-standard macro creation, conversion or customization. Tailoring of any standard template or macro.
Tasks associated with the integration between LawSuite and other software programs duly licensed and used by Client.
Document conversions.
MS Word installation, configuration and setup or general MS Word consulting or training.
Audit and analysis of any existing macro product with feature comparisons, user surveys, etc.
Consultative work required for firms migrating from Corel® WordPerfect.
Any Client-site work including consulting, development, testing, customization, or any other work necessary for the proper functioning of LawSuite or any other tasks requested by Client, or any changes or adjustments made to any part of LawSuite or any other services not listed above.
